Lentivirus-mediated TPD52L2 depletion inhibits the proliferation of liver cancer cells in vitro [Retraction]

Several similar articles were published within the similar timeframe of this article as disclosed by a knowledgeable informant and subsequently confirmed by the Editorial Office. Although the authors claimed the data were original and the actual experiments were sourced out to a biotechnology company, they failed to response to editor’s further inquiries and concerns in a timely manner. Therefore, the entire article has been retracted in accordance with this journal’s policy and Editorial decision.
